Professional Summary

Motivated Computer Science student seeking a Selenium Java Automation Testing role. Leveraged Core Java programming features and OOP concepts to build scalable automation solutions. Designed and executed comprehensive functional, regression, smoke, and sanity test scenarios, documented defects, and verified bug fixes using Selenium WebDriver, TestNG, SQL, Git, and automation testing best practices.

Technical Skills

Languages: Core Java, SQL

Automation: Selenium WebDriver, TestNG, JUnit, Maven, Page Object Model (POM), Data-Driven Testing, Cross Browser Testing

CI/CD: Jenkins

Manual Testing: SDLC, STLC, Functional, Regression, Smoke, Sanity, Integration, System, UAT

Tools: Git, GitHub, Eclipse, IntelliJ IDEA, Postman, MySQL

Automation Project

Automated Testing of E-Commerce Web Application

- Designed and executed end-to-end automation scripts for Login, Registration, Product Search, Add to Cart, and Checkout workflows.
- Implemented Page Object Model (POM) design patterns to enhance framework maintainability.
- Developed reusable Selenium WebDriver scripts using Core Java, TestNG, and Maven.
- Performed functional, regression, smoke, and cross-browser testing.
- Generated TestNG HTML reports and tracked defects using structured bug reports.
- Configured and maintained CI/CD build pipelines using Jenkins for automated test execution.
- Managed source code using Git and GitHub.

Academic Project

AI Enhanced Placement Management System

Python, Django, MySQL, HTML, CSS, JavaScript. Developed an AI-powered placement platform with resume analysis, job recommendation, recruiter and student dashboards.

Education

Bachelor of Engineering (Computer Science Engineering) – Expected Graduation: 2027

Certifications

Selenium with Java Automation Testing, Manual Testing, Core Java, SQL, Git & GitHub

Strengths

Analytical Thinking, Problem Solving, Team Collaboration, Attention to Detail, Quick Learner
